

Contents

Izabela Roman, Arthur Clark and Phillip D. Swanson The Interaction of Calcium Transport and ADP Phosphorylation in Brain Mitochondria	1
Ulrich Hopfer and Carole M. Liedtke Kinetic Features of Cotransport Mechanisms Under Isotope Exchange Conditions	11
T. Wiedmer and P. K. Lauf Properties of the M Antigen Solubilized from Genetically High Potassium Sheep Red Cells	31
Vito Scalera, Yu-Kuo Huang, Bruno Hildmann and Heini Murer A Simple Isolation Method for Basal-Lateral Plasma Membranes from Rat Kidney Cortex	49
M. Silverman The Mechanisms of Maleic Acid Nephropathy: Investigations Using Brush Border Membrane Vesicles.	63
John C. Matthews, Jordan E. Warnick, Edson X. Albuquerque, and Mohyee E. Eldefrawi Characterization of the Electrogenic Sodium Channel from Rat Brain Membranes Using Neurotoxin- Dependent ^{22}Na Uptake	71
C. A. Boicelli, C. Ramponi, E. Casali, and L. Masotti Ubiquinones: Stereochemistry and Biological Implications	105
G. Fini, and I. Pasquali-Ronchetti Raman Spectroscopic Investigations on Conformational Changes Induced by Some Phenol Derivatives on Phospholipid Membranes	119

Dick Hoekstra, Jos Van Renswoude, Ron Tomasini and Gerritt Scherphof	
Interaction of Phospholipid Vesicles with Rat Hepatocytes: Further Characterization of Vesicle-Cell Surface Interactions; Use of Serum As A Physiological Modulator	129
A. Spisni, G. Sartor, L. Masotti, and G. Lenaz	
Effect of CoQ Homologues on the Fluidity of Phospholipid Bilayers as Studied by Fluorescence Polarization of Perylene	149
Arlene D. Albert and Philip L. Yeagle	
The Extent of Transmembrane Phospholipid Movement in Mixed Phosphatidylcholine-Phosphatidylserine Vesicles	159
Naoki Kamo, Toinette Racanelli, and Lester Packer	
Light-Dependent Δ pH and Membrane Potential Changes in Halobacterial Vesicles Coupled to Sodium Transport .	175
Pegram A. Johnson and Rose M. Johnstone	
Partial Purification of Amino Acid Transport Systems in Ehrlich Ascites Tumor Cell Plasma Membranes	189
Maurice C. Kemp, Richard W. Compans, Bruce Caterson, and John R. Baker	
Characterization of Glycosaminoglycans Associated with Rauscher Murine Leukemia Virions	219
John N. Howell	
The Interaction Between Ruthenium Red and the Isolated Sarcoplasmic Reticulum	235
Duncan H. Haynes and Moshe M. Werber	
Inhibition of the Ca^{2+} - Mg^{2+} ATPase of Sarcoplasmic Reticulum by Co-(phen)-ATP	247

- M. Ramjeesingh and Aser Rothstein
 The Location of a Chymotrypsin Cleavage Site and of
 Other Sites in the Primary Structure of the
 17,000-Dalton Transmembrane Segment of Band 3, the
 Anion Transport Protein of the Red Cell 259
- B. R. Stevens, S. H. Wright, B. S. Hirayama, R. D. Gunther, H.
 J. Ross V. Harms, E. Nord, I. Kippen, and E. M. Wright
 Organic and Inorganic Solute Transport in Renal and
 Intestinal Membrane Vesicles Preserved in Liquid
 Nitrogen 271
- R. Blumenthal, E. Ralston, P. Dragsten, L. D. Leserman, and N.
 J. Weinstein
 Lipid Vesicle-Cell Interactions: Analysis of a Model for
 Transfer of Contents from Adsorbed Vesicles to Cells . . 283
